UNIQUE

IN

SOUL

Craftsmanship, innovation and sustainability are the three pillars on which PALILA firmly grows. Having the eye and the environmental consciousness enables us to be at the frontier of bringing our customers the best lifestyle products for those looking towards a green future and a heartfelt past.

### 1) Craftsmanship

At PALILA, all of our products are hand made by local artisans to ensure the highest quality and reliability. We value the hand's work from start to finish as an emotional fingerprint stamps the product, aging timelessly with you.

### 2) Innovation

Being a young company, we have the grit to work with new materials and techniques that allow us to produce genuinely unique accessories. The combination of wood and leather allows us to achieve innovative designs for those looking for a balance between the sleek city life and the roots of wild life. It is perfection and simplicity in one accessory.

### 3) Sustainability

Our philosophy from day one to make eco-friendly products is achieved through the 3 R's: reducing, recycling and reusing. We are conscious of the production process from scratch to finish reducing the amount of waste material and energy used to produce our products. Also by using renewable and recycled materials we minimise our impact on the environment. Our minimalist yet practical designs reduce the amount of material needed to build them while maintaining all of their practicality.

PALILA WOODEN SKINS  
ARE REMOVABLE BACK CO-  
VER STICKERS HAND MADE
